

As a paying member of XM Radio I would urge you to reject  
NAB's petition 04-160

I am a over the road truck driver and find the weather and traffic info is very important in my daily travel thru the city's of this country. It has helped me numerous times to avoid traffic problems and be aware of the weather situations, if it was not for XM's continuous up to date information there would have been many times where I would have been delayed.

The XM broadcast provides me with a service that cannot be met 24-7 by any other means! It is a vital link in the transportation industry that would be greatly missed.
